Multipart and Upload File Contension: Files can be loaded as "Multipart/Form-Date" or file containing (upload http put file). File Uploads between websites: Supports file upload to a different domain with XMLHttpRequests Cross-sites or IFRAME redirections. The xDomainrequest object allows only requests to obtain and post and do not support file uploads. If you want to know more, we have a dedicated FTP article that you should analyze. How to facilitate file transfer, many people celebrate the error of sending files in their gross formats, but this only makes the task difficult. The disadvantage is also loses something in the process. What you need is a dedicated service to transfer files. Cancer Uploads: Individual file uploads can be canceled to interrupt upload progress. A paid service offers some benefits that can attract you, especially if you want to keep things simple. If you have a life with which another developer can help it, post to stack the excess and mark your question with the upload of the Blueimpp Jquery file. Enter you in the comment box below. Supports uploads of crossed, tracked and summarized files and resizing images on the client's side. Do you have any suggestions or comment? Drag and release support: Allows you to upload files by dragging them from your desktop or file manager and loosening them in the browser window.
